

# BBACK25

## Beef Backgrounding Premix

### Features and Benefits of BBACK25:

- Specifically designed to promote optimum growth when back-grounding beef cattle
- Provides essential Vitamins and Minerals to meet nutrition requirements that will not be met by forages and grains alone
- Formulated with high quality ingredients that have been researched thoroughly and proven to help animal health, growth, and efficiency
- Our nutrition team can design rations to mix BBACK25 with a variety of on farm grains and forages
- Can be purchased with Rumensin or plain/without medications
- Works in rations for a wide variety of cattle weights, up to 1000 lb cattle
- Available in 25 kg bags or in bulk for orders of 1 MT or more

All premixes from Jones Feed Mills are produced in our modern premix facility located in Linwood. This facility is operated with modern software and machinery to ensure accurate ingredient inclusion in all premixes.
