

DDGGS2/DDGGS3

Distillers Based Beef Grower Supplements

Features and Benefits of DDGGS2/DDGGS3:

- Specifically designed to promote optimum growth when back-grounding beef cattle
- Combines a protein source with vitamins and minerals to meet nutrition requirements that will not be met by grains and forages alone
- Produced using high quality, low toxin distillers grains and minerals to help with animal health and growth
- Our nutrition team can design rations to mix DDGGS2 or DDGGS3 with a variety of on farm grains and forages

- Can be purchased with Rumensin or plain/without medications
- Competitively priced to make it more economical as well as efficient to buy one mix rather than buying ingredients separately
- Available in bulk orders of 1 MT or more and can be produced in pellets or meal depending on customer preference.

Ask our team about forage sampling- we provide nutritional analysis on your first sample free of charge!

Contact our experienced and knowledgeable Beef Specialists for more information or for an on-farm consultation.
