

Mare & Foal Feed

Jones Select 16 Pellet

Protein: 16%, Fat: 6%, Fibre: 16%

This specialty formulated broodmare pellet can also be fed to foals and weanlings as well as yearlings. The high quality ingredient mix makes this feed ideal for gestation, lactation and growth.

Senior Feed

Jones Senior Horse Pellet

Protein: 14%, Fat: 10%, Fibre: 18%

Contains high quality, digestible ingredients for the mature/senior horse. The energy in this feed is provided by highly digestible fat and fibre sources. This complete feed also contains elevated protein, vitamins and minerals to help aid in a graceful aging process.

Jones Feed Mills has many equine feed options available for your consideration. Feeds are carefully formulated using a blend of research, experience and quality ingredients. All JFM equine feeds are made at our HACCP certified, drug-free facility.

THE COMPLETE JONES EQUINE FEED PROGRAM

Fat & Fibre Feeds (No Corn)

Low Fat Easy Feed

Protein: 13% Fat: 2%, Fibre: 22%

Low fat, high fibre pelleted complete feed. Great as a hay extender pellet or for easy keepers requiring a low sugar and starch diet.

Mid Fat Easy Feed

Protein: 13%, Fat: 5%, Fibre: 22%

Mid fat, high fibre pelleted complete feed. Excellent for maintaining body condition on horses in light to moderate work. This feed provides cool energy, low sugar and low starch.

High Fat Advantage Easy Feed

Protein: 13%, Fat: 8%, Fibre: 20%

High quality digestible fat and fibre sources, ideal for those harder keepers or horses in moderate to intense work. Provides cool energy.

Sweet Feeds

AP13

Protein: 13%, Fat: 3%, Fibre: 4.8%

Low fat, economy sweet feed.

Jones Pferd Ration

Protein: 14%, Fat: 6%, Fibre: 15.9%

Mid fat, high fibre sweet feed.

Jones PowerEdge

Protein: 14%, Fat: 6%, Fibre: 16%

Mid fat, high fibre premium quality sweet feed. Ideal for working horses with higher energy requirements.

Jones Select Swift

Protein: 13.5%, Fat: 8.5%, Fibre: 12%

High fat performance ration. This is a performance feed that can also be fed to horses requiring higher fat to maintain condition and cool energy.

Balancer Pellets

A balancer pellet is designed to provide vitamins/minerals and protein to the horse in a condensed form. They can be used to meet the nutrient requirements of over-weight or easy keeper horses without adding extra calories to the diet. They can also be used as a top dress to another feed being fed below the recommended levels to ensure the horse's nutrient requirements are being met.

Jones Select One

Protein: 12.9%, Fat: 2%, Fibre: 14%

A balancer pellet designed for easy keepers and horses in light to moderate work.

Jones Peak Stride

Protein: 31.9%, Fat: 5%, Fibre: 8%

A high protein balancer pellet designed for hard working performance horses.

Feed Recommendations

Light Work and Easy Keepers:

Select One, Low Fat Easy Feed, AP13

Medium Work:

Mid Fat Easy Feed, PeakStride, Pferd, Poweredge

Hard Keepers:

High Fat Advantage, Select Swift, Senior

Performance:

High Fat Advantage, Select Swift, Peak Stride

Feeding Directions for Complete Rations

Feed 0.5-1.5 kg/100 kg of body weight daily, according to the amount of work performed, the condition of the horse and the quality of the hay. Feed with clean fresh water.

Research indicates that high-quality fibre diets quickens the rate of saliva absorption. Because JFM uses high quality fibre in its feeds, it is recommended to add 2-3 parts water to pelleted feeds and deliver feed within 1 hour after wetting.

Most Jones Feed Mills equine feeds contain pre and probiotics, added omega-3s and a toxin binder. Ask your Jones Equine Sales Consultant for more information.
