Baby News!

Jessica and Ryan Harrop are excited to announce the arrival of Ivy Anne Harrop, who arrived June 14th. All is well and Ivy has already met the cows and now spends time with Mom and Dad in the milking parlour. All of us at Jones congratulate to Jess and Ryan!

E-Transfers Now Accepted

Jones Feed Mills is now able to accept e-transfers for account payments. Payments can be emailed to: receivables@jfm.ca

(Please note, this is the only email address that can accept payments)

How Clean Is Your Feeding Equipment?

By Nicole Follings, JFM Market Support Specialist

Ensuring bottles, nipples, pails, buckets, and tube feeders are squeaky clean is an important part of raising healthy calves. It is especially important to analyze your cleaning protocol if you are experiencing challenges in your calf barn, ie. a scours outbreak.

PRO-Clean Protein Residue Tests are designed to detect protein on a surface, which can indicate the improper removal of residue during cleaning. The test is used to swab the surface of interest. A chemical reaction will take place, and the solution will change colour, based on how much protein residue is present. These tests are quick and simple and can give you an indication of hygiene in your calf feeding system, and point out areas that could use some improvement.

Are you interested in learning more about this service?
Looking to step up your cleaning and disinfecting protocol?
Call or text Nicole Follings at 519-807-3870 for more information or to set up an appointment.

Book Your Beef Grower Feed Now!

Jones Feed Mills is currently accepting bookings for our 13.5% beef grower pelleted feed. Bookings for this period are accepted up until July 15/22 and will expire on September 30/22. As a reference, booking your feed is similar to locking in a mortgage vs. buying against the weekly price. For more information on booking your beef grower feed, contact a member of the JFM Beef Team or call the office and ask for a booking for BBGP.

Updated JFM Covid-19 Protocols – July 2022

Linwood – The office is now open for Customers to enter and access our Customer Service Team. Look for the signs in the front foyer for instruction. Welcome back!

Heidelberg - The Miller's Stone Store is open to the public without restriction.

Wroxeter - The Wroxeter Mill is open with restricted access to the store/office.

Note: Physical distancing is encouraged while at all JFM facilities. Masks are optional and are available for those requesting. Access to JFM manufacturing mills & warehouses remain off limits.

JFM Heidelberg Chick Days

Order Date	Available	Pick-Up Date
Monday May 30/22 Monday May 16 RTL	Chicks, Turkeys, Ducks, RTL	Tuesday July 5/22
Monday July 4/22 (New date added)	Chicks, Turkeys, Ducks	Tuesday August 9/22

- Ask about our new Poultry Starter Kits!
- Jones Feed Mills can supply you with all of your feeder, Waterer and brooding supplies and of course, feed!
- Please bring your own crates or boxes when picking up RTL.
- Call to reserve a pick-up time for RTL – Crates/boxes can not be left at mill the preceding night due to Avian Influenza bio-security protocols

Summer Nutrition Tips for Beef Producers – by Michaela Stoneman, JFM Ruminant Nutritionist

Summertime means breeding season for many of our cow-calf producers. A reminder from your JFM nutrition team to make sure your cows have access to a high quality, complete mineral supplement. Trace minerals play a large role in the reproductive health of cattle and help to ensure optimal reproductive success. Additionally, as cattle continue to graze pastures, a reminder of the importance of pasture minerals. Pasture minerals help to ensure optimal growth, maintenance, and reproductive performance in pastured cattle. The JFM nutrition team would also like to emphasize the importance of good bunk management during warmer weather. Warm weather depresses feed intake, so ensuring cattle have consistent access to feed will minimize average daily gain losses. Summertime also means that hay, haylage and baleage season is well underway. Good forage quality is key in any successful beef operation, so be sure to reach out to your JFM beef team with any questions regarding making good quality forages this season.

Finally, as flies continue buzzing around the barns and pastures be sure to inquire about adding garlic to your mineral, supplements, or complete feeds for fly control this summer.

High Pathogenic Avian Influenza (HPAI) Update

Avian Influenza (*aka Bird Flu*) continues to be a threat to Ontario Agriculture in specific areas of the province. Jones Feed Mills continues to take all necessary precautions to help reduce the spread of the virus which includes, but is not restricted to, disinfecting all incoming supplier vehicles, disinfecting all feed delivery vehicles upon arrival on farms (in and out within perimeter zones), disinfecting all JFM sales and service vehicles when arriving at farms that house poultry. All personnel entering any Jones facilities must also use disinfecting foot mats to disinfect their feet before entering any JFM facility (including offices). JFM will continue to use these precautions until otherwise instructed by CFIA, OMAFRA, The Feather Board and Chicken Farmers Ontario. For more information on Avian Influenza, prevention measures or JFM's approach to managing this situation, please call Jones Feed Mills at 1-800-265-8735.

Skid-Wrap Reminder

JFM reminds all customers that when receiving bags on skids to **remove the shrink wrap immediately upon receipt of your order** to allow bags to breathe and prevent sweating, therefore avoiding mold and reduced feed quality. The same applies in all seasons, but this is particularly important in the warmer months.
