Poultry Feeds

As Nature Intended

Feeding Guidelines

All of the Maitland Valley poultry feeds are supported by complete feeding recommendations by species. Our nutrition teams are current with the needs of all types of poultry and formulate our feeds with your flock's health and performance in mind.

Maitland Valley feed representatives are available to assist you with feeding program design, nutritional inquiries and general poultry husbandry support. In addition, you can find specific feeding guidelines by bird type below:

Nutrition

Sourcing natural and the best ingredients for your feed is only one step towards making feed that is right for your flock. Maitland Valley has its own nutritional team to formulate feeding programs that meet the needs of all of our livestock feeds. Our commitment is to ensure that our feeds will perform to your expectations and keep your birds healthy.

Product Sourcing

All of the ingredients used in the Maitland Valley poultry feed line are carefully selected from recognized farmers and suppliers. Quality is our top priority when choosing grains, minerals and vitamin sources. We are proud to work with many of our local farmers who supply us with grains used in our feeds. We are committed to a rigid non-GMO testing procedure with our core ingredients to ensure you have feed as nature intended.

Bird	Stage	Feed	Rate	Notes
