Jones Feed Mills Ltd.

Swine Feeds

As Nature Intended

Certifications

Maitland Valley swine feeds are manufactured in accordance with the Canadian Food Inspection Agency's regulations.

Feeding Guidelines

All of the Maitland Valley Feeds are supported by complete feeding recommendations by species. Our nutrition teams are current with the needs of all types of management systems and formulate our feeds with herd health and performance in mind.

Maitland Valley feed representatives are available to assist you with feeding program design, nutritional inquiries and general husbandry support. In addition, you can find specific feeding guidelines by stage below:

Nutrition

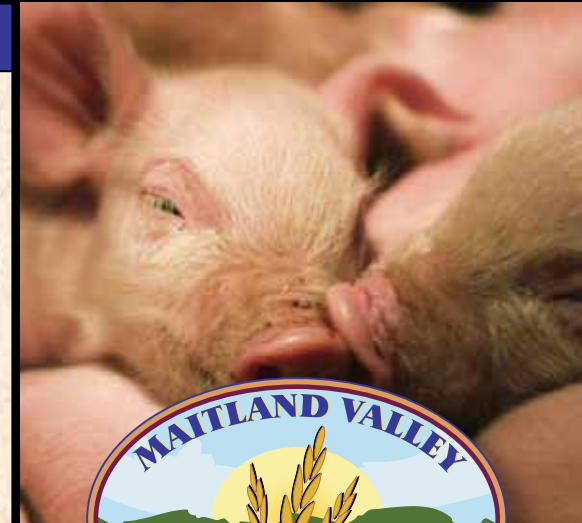

Sourcing natural and the best ingredients for your feed is only one step towards making feed that is right for your herd. Maitland Valley has its own nutritional team to formulate feeding programs that meet the needs of all of our livestock feeds. Our commitment is to ensure that our feeds will perform to your expectations and keep your pigs healthy.

Product Sourcing

All of the ingredients used in the Maitland Valley swine feed line are carefully selected from recognized farmers and suppliers. Quality is our top priority when choosing grains, minerals and vitamin sources. We are proud to work with many of our local farmers who supply us with grains used in our feeds. We are committed to a rigid non-GMO testing procedure with our core ingredients to ensure you have feed as nature intended.
