Calf Guy Tours Producers Through Ohio Research Facility

Last month, Tom Mosterd (aka The Calf Guy) toured area dairy producers through the Akey Calf Research facility in Brookeville, Ohio. Participants were able to learn from the researchers themselves about the many trials performed on calf starters, milk-replacers, whole milk etc. This tour is a program that Tom has initiated and will be running again. To learn more call/text Tom at 519-807-3870

Ontario Dairy Producers take part in the discussion at the Akey Calf Research facility, Ohio

Jones/Elanco Food Drive – A Giant Success!

The recent Jones/Elanco Canada Food Drive was a great success. Employees and suppliers alike all contributed to the effort. The Drive was further complimented by Jones Feed Mills matching all contributions, bringing the food drive total far above the anticipated amount. Doug Helm of Elanco comments, "We are thrilled with the big response from the Jones Team and were excited to work with them on this exciting project." Jones Feed Mills wishes to thank Doug Helm and Elanco for asking Jones to participate in this worthy cause. Further thanks go out to all of those who contributed to the Drive as well as Schnurr's Grocery in Linwood for their tremendous support!

Victoria Pringle and Meaghan Weber of Jones along with Doug Helm of Elanco pack boxes of food destined for area food banks into Doug's vehicle.

FUTURES

October 31, 2016

Nov 11 – Remembrance Day

Nov 21-22 OFA AGM Toronto

Nov 29 Forage Focus Shakespeare

Nov 29 Dairy & Veal Healthy Calf Conference* – Stratford

*JFM Exhibiting or Sponsored

Receiving Cattle Guidelines

As fall cattle begin to be received into area feedlots, the Jones Sales and Nutrition Teams wish to remind you of the below feeding and management practices to ensure a smooth transition for your newly received cattle. The Jones STRESSFIGHTER program has a long history of helping Producers get their cattle the nutrition they need to get them off to a healthy start. Be sure to speak with a member of the Jones Beef Team before, during and after the arrival of your calves as we are here to assist and can design and monitor a custom program for you that will work through the entire back-grounding or grow/finishing process.

Upon Arrival...

- ☐ Adapt cattle quickly to new surroundings
- ☐ Maximize vaccine/immune response
- ☐ Get them eating & drinking
- ☐ Target initial intakes of 1.5% of BW DM
- ☐ Goal to 2.0% BW DM and hold 5 to 10 days
- ☐ Target 2.5% BW DM
- ☐ Keep cattle a little hungry
- ☐ Observe those cattle who are slow to bunk
- ☐ Feed 2 times /day (or more).
 - ☐ Promotes eating habit
 - ☐ Promotes fresh feed

BW = Body Weight
DM = Dry Matter

Receiving Ration Examples for 500 lbs. Calves (lbs./day)

INGREDIENT	PREMIX (As Fed)	SUPPLEMENT (As Fed)	COMPELTE FEED (As Fed)
HAY	7.0	6.0	6.0
