Veteran of JFM and Feed Industry

We are not sure how far one would have to go, or how many people one would have to speak to within the feed industry before we would find one that doesn't know the name Bert Pletsch. "Bert" as we all know him, has been instrumental in the development and success of Jones Feed Mills, as his 44 year tenure has taken him through 2 generations of Jones' as well as the development and expansion of the four mills that support the Jones Feed Mills logo today. Also responsible for many of the business and personal relationships all of us at JFM appreciate today, Bert smiles when he says he "enjoys working on putting lasting relationships together with staff and customers". Bert has worked in almost every role that a feed company can offer and is relied upon for input and advice on all of these roles today. Today Bert works within sales where he focuses on many of the commercial, specialty and export business accounts as well as some of the area's farms. Bert also represents JFM at many industry functions. Bert is not selfish with his time. He is always there to help, take on new tasks or advise. He is an avid volunteer as seen by his time spent with the "Out of the Cold" program in K-W as well with his church. When asked to summarize his experience at Jones, Bert comments, that he "likes the team approach of the company to serve our customers well". Bert lives in Waterloo with his wife, Louise where they have two sons, Tim (Jill) and Dave (Les). Bert and Louise have 6 grand-children. Bert enjoys a good game of golf as well as spending time with his family.

Jones Mount Forest Beef Producer Meeting Draws Keen Interest

On August 26, the Jones Beef Team hosted a Beef Producer Information Night and BBQ at Meadowbrook Agri Systems in Mount Forest. About 60 Producers and their families came out to enjoy the food, information and hospitality. Headlining the event were three speakers. First up was Dr. Peter Kotzeff of Chesley Veterinary Management who spoke on starting and conditioning calves, vaccination protocols, housing and handling equipment. Next up was Dr. Randy Dew of Akey Nutrition who spoke on feeding protocols and nutrition for new calves. Later, Mike Edwards, Manager of Nutrition Services for JFM, summarized the evening's discussion and provided information on JFM starting feeds such as "Stressfighter". Talk to a member of the Jones Beef Team to learn more or to receive a copy of the proceedings and to learn about our fall promotion on Stressfighter products.

JONES WSC-26-26-17 MILK REPLACER with DECCOX

Last spring, the Jones Nutrition Team reformulated the popular Jones Whole Start Milk Replacer to include "Deccox" to aid in the prevention and reduction of Coccidiosis. Since that time, many Producers have commented on how the new formulation has greatly helped their calves through some of the critical periods of early life. Talk to your Jones Dairy Sales Consultant to learn more and to receive your copy of the new Jones calf program as a result of new Akey Research.

New Elevator Leg for Jones Micronizers

Jones Maintenance Staff install new elevator leg for the micronizers on September 2.

The first week of September was a busy one for the Jones Maintenance and Production Teams as a new elevation leg for both the Jones micronizers was installed. This leg will support the increased demand for Jones micronized products as well as fit into the regular Jones maintenance program for equipment updating. With increased cattle prices, JFM has seen a significant increase in demand for Jones micronized products. JFM wishes to thank both the Jones Maintenance and Production Teams for their preparation and work on this project. JFM also thanks our local Linwood residential neighbours for their patience for the increased traffic during this project.

To Serve you Best – Please use the below chart as your order-time guideline.

Feed Category	Order Time
Local Bag Delivery	< 10:30 AM for next day delivery
Local Bulk Delivery	< 10:30 AM for next day delivery
